Focal Chondral Lesions and Joint Preservation

Master Class on CARTILAGE REPAIR

24-25th January 2025, Ahmedabad, India.

WELCOME MESSAGE

Dear Delegates,

We are happy to announce the second season of **Master Class on Cartilage Repair**, to be held in Ahmedabad, India on 24-25th January 2025. The event will be a dedicated two-day conference which specifically targets a very niche area called **Cartilage Repair and Joint Preservation**. Master Class has always been a concept enhancing experience and is always attended by younger colleagues as well as senior colleagues with a similar enthusiasm and dedication. We are very happy to share that more than **12 international faculties** and over **20 national faculties** have already confirmed their participation for this benchmark event. The chosen faculties have dedicated their whole life for the science of cartilage repair and joint preservation, which is backed by countless scientific papers and presentations. We are glad to offer many networking opportunities with them, apart from dedicated sessions.

The backbone of any cartilage lesion repair is a good diagnosis which largely depends on a good MRI scan and a good MRI reporting. As Joint Preservation Surgeons, we always face a challenge of proper assessment of cartilage lesions. Along with this, a level-understanding between the MR-Radiologist and the Surgeon is equally important. The MR-Radiologist must know the expectations of the Surgeon and vice versa. We are very happy to announce a half day dedicated **Knee MR Radiology Workshop**, a first of its kind. It is designed to improve the understanding and coordination between the Surgeons and the MR-Radiologists.

Orthobiologics is in vogue and all of us want to transfer the benefit of this amazing technology to our patients. Another **Workshop on Orthobiologics** is being designed to do just that.

January is always a pleasant month to be in Ahmedabad, with comfortable temperatures and low humidity. It is also a time where many festivals are held in Ahmedabad.

See you there, in January 2025 in Ahmedabad.

ENDORSEMENTS

Master Class on Cartilage Repair is proud to have support of these organisations.

Master Class on CARTILAGE REPAIR

INTERNATIONAL FACULTIES

The Master Class on Cartilage Repair is proud to introduce top-notch faculties from around the World. Each faculty is a master in their unique field of cartilage repair. Their research has been cutting edge and they have produced many highly cited publications. Delegates will not only benefit from their experience during the scientific program but will also have plenty of networking opportunities .
