

Master Class on Cartilage Repair: Season II 24-25th January 2025, Ahmedabad, India

Dear Industry Partners,

We are happy to announce the **second season** of **Master Class on Cartilage Repair**, to be held in Ahmedabad, India on 24-25th January 2025. Master Class on Cartilage Repair is a dedicated two-day conference which specifically targets a very niche area called *Cartilage Repair and Joint Preservation*. The Master Class had always been a concept enhancing experience and is always attended by younger colleagues as well as senior colleagues with a similar enthusiasm and dedication. This year's theme is '**Focal Chondral Lesions and Joint Preservation**'. We are expecting around 300-350 delegates for the conferences. In addition, there will be an **MR-Radiology Workshop** to improve on better reporting of cartilage injury cases and cartilage repair cases amongst arthroscopy surgeons and radiologists. We are also planning a dedicated **Orthobiologics Session** to cater to the newer developments in the field of joint preservation.

With more than 12 international faculties and over 20 national faculties, the Master Class is set to be a benchmark event in the field of cartilage repair. We seek your valuable support in this mega-event as industry partners.

Best Wishes

Team Master Class
